

European Breeding Bird Atlas 2 Workshop

Conclusions

EBBA2

European Breeding Bird Atlas

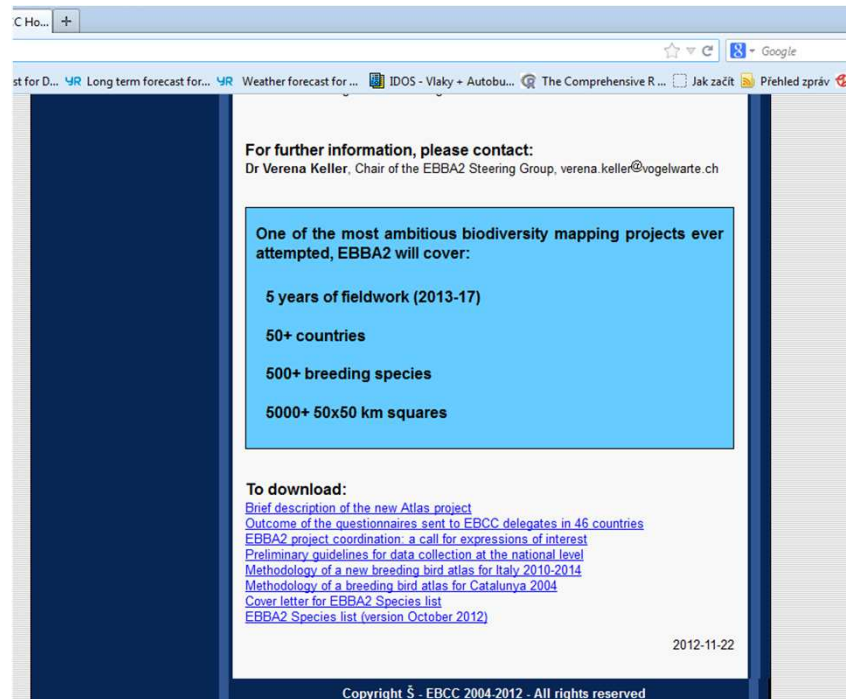

- grid EOA 50x50 km to be used
- At the country level we prefer collation of data at finer scale
- countries to start fieldwork and deliver data in Atlas format to the EBBA2 coordinators in autumn 2013, preferably before the EBCC conference in Cluj (September 2013) - TRIAL
- the grid at the country level will be provided to the countries soon
- EBBA2 coordinators will send forms for data delivery to the national coordinators
- data required: square, species, breeding code, abundance category

- Countries/national coordinators to seek actively for advice from the EBBA2 coordinators in:
 - field methods
 - Design of national atlases
 - on-line portals
 - fieldworkers
 - countries who need help from foreign birdwatchers to specify their needs, offers and constraints and to communicate them to EBBA2 coordinators
 - funding
 - any other problem

- countries/national coordinators to give a feedback to the EBBA2 coordinators, any positive news to be shared with others, e.g. via EBCC web site
- EBBA2 coordinators and ASC are available for methodological help and other assistance
- presentations in pdf will be made available to the participants
- suggestions, requirements and other outputs from discussions will be summarised and made available to participants

- Check EBCC web site

<http://www.ebcc.info/new-atlas.html>

- Come to the EBCC conference in Cluj (Romania), September 2013

THANK YOU!!!
