Introduction

The European Bird Census Council EBCC plans a new Atlas of Breeding Birds. As part of the planning process the Steering Committee approached the EBCC delegates with a questionnaire in order to get background information on the individual countries. The questionnaire was accompanied by a short project description. Documents are found in the annex. The main objectives of the questionnaire were:

- to inform the EBCC network on the planned atlas
- to investigate whether countries are interested to contribute
- to create a list of national contact persons and possible atlas coordinators
- to update our knowledge on recently published existing national atlases
- to receive information on planned national atlases
- to explore possibilities of collaboration and needs for support
- to get an overview on existing national online platforms to collect data

This summary report presents a summary of the answers received. The EBCC Steering Committee would like to thank the many people who helped fill the questionnaire in their country.

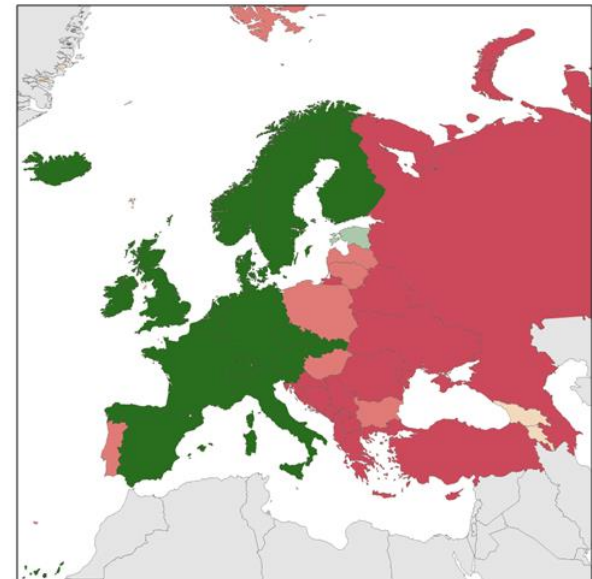

Scope

The questionnaires were sent out to EBCC delegates in 46 countries. In a few cases, where EBCC has no delegates or when we did not get a response, other persons, such as BirdLife network, were contacted. Delegates were encouraged to contact the EBCC in their country where appropriate and to send back one questionnaire per country. Questionnaires were sent out on 31 October 2011, followed by reminders in January. By 9 February 2012, when the results were presented at the Birds Meeting in Mikulov, Czech Republic, we had received answers from 42 countries. We also received responses from Andorra, Armenia, Georgia and Malta. In three cases, two questionnaires were sent back from the same country.

EBBA2 Questionnaire 2011 – Summary Report

Support from outside country needed

- no
- uncertain
- funding
- funding plus advice, material, observers etc.

2013: Barcelona workshop

Data management at national level

*from diverse data sources to
integrated atlas outcomes*

MAVA project 2015-2017

	2015	2016	2017
Objective 1. To increase the capacity for bird surveys in the target countries in east and southeast Europe in the framework of the European atlas.			
<i>Activities</i>			
Training workshops	Ukraine	Bosnia & Herzegovina	
	Serbia	Belarus	
		Moldova	
		Azerbaijan	
		Kosovo	
Foreign birdwatchers train local ones	Armenia	Greece	
	Georgia	(Turkey)	
Small grants to countries	14 countries	20 countries	23 countries

23 partner countries

MAVA project 2015-2017

	2015	2016	2017
Objective 2. To increase the technical skills of national coordinators and organisations in the fields of data collection, database management and project coordination.)			
<i>Activities</i>			
Coordination and data management workshops	EBBA2 workshop Mikulov	EBCC conference Halle	
Regional coordination workshops		Caucasus Western Balkans data management (with Euronatur)	
Provision and training of forms and data management tools	x	x	x
Bilateral support and visits to ICO		Russia	Ukraine Greece Georgia Bosnia & Herzegovina

MAVA project 2015-2017

	2015	2016	2017
Objective 3. To facilitate data collection and exchange via online recording platforms			
<i>Activities</i>			
Financial support to adapt national platforms		Greece Cyprus	Armenia
Adaptation of international platforms		BirdTrack Observation.org (Naturalist/ornitho)	

MAVA project 2015-2017

Objective 4. To provide data for the European atlas and national atlas projects			
<i>Activities</i>			
Data transfer tools developed	x	x	national online tools for 16 countries
Encouragement of foreign birdwatchers	x	x	gap-filling competition
Compilation of data from international online platforms		x	x
Final evaluation workshop			workshop Croatia

MAVA project 2015-2017

	2015	2016	2017
Objective 5: Fundraising			
<i>Activities</i>			
Species sponsorship		x	x
Preparing applications etc	x	x	x

MAVA project 2015-2017

Grant: 840 000 Euro
